

## Michael Andregg

Founder and CEO  
Eon Systems

Michael Andregg is the CEO and co-founder of Eon Systems, company focused on human brain emulation. Based in San Francisco, he previously co-founded Fathom Radiant (optics-based computing hardware for AI) and Halcyon Molecular (high-speed genome sequencing via electron microscopy).

His work spans optical supercomputing, robotics, and most recently whole-brain simulation — including a 2026 project that uploaded a fruit fly connectome into a physics-simulated body.
