

## Rayyan Islam

Co-Founder  
8090 Industries

Rayyan Islam is Co-Founder of 8090 Industries, where he works to expand America's energy and industrial capacity at a sovereign scale. In 2025, Rayyan led 8090's co-development of American Intelligence and Power Inc. (AIP), America's largest AI data center campus with 8 GW of capacity, which was acquired by Nscale. Most recently, Rayyan co-founded Sentinel, a fully distributed, modular power and compute utility.

Rayyan was the largest investor in the nuclear company Oklo prior to its public listing and is part of the development group behind Prototown, a 3,500-acre industrial and manufacturing campus in central Texas. Rayyan advises government leaders and institutions on energy and industrial policy and has been recognized among Business Insider's top early-stage investors and Fortune's leading energy and climate technology investors.

Prior to co-founding 8090 Industries, Rayyan built experience at the intersection of finance, manufacturing, technology, and energy, and previously worked at firms including Spotify, Deloitte, NASA, and UBS.
