

Lukas Czingier

Co-Founder & CEO
Divergent

Lukas Czingier is the CEO and Co-Founder of Divergent Technologies and CEO and Founder of Czingier Vehicles.

Divergent is building the new industrial age. With its manufacturing platform, DAPS™, the company designs, builds, and assembles structures and solutions across critical industries.

Under Lukas' leadership, Divergent has scaled its dual-use production capacity and expanded capabilities for aerospace and defense customers, raising \$1B+ at a \$2.3B valuation. The company has 30+ active customer programs, including defense contracts with RTX, Lockheed Martin, General Atomics, Triumph Group, Saab, and other leading primes, as well as Bugatti, Aston Martin, McLaren, and other leading OEMs in the automotive sector.

Lukas is recognized as a leading voice on the modernization of the American industrial base and future of manufacturing globally. He holds a degree in Electrical Engineering from Yale University.
